

Rock Cycle Notes Assignment

- I. Pick up a blank sheet of paper. Using the laptop computers, look up, and define the following terms as they relate to the rock cycle. Write the terms and definitions neatly on one side of your paper. Please summarize and use your own words as much as possible.

Compaction
cementation
Weathering
Melting
Pressure

Deposition
Erosion
Sediment
Sedimentary rock
Metamorphic rock

Magma
Uplift
burial
Igneous rock

- II. On the unused side of your blank sheet of paper, create a diagram illustrating the rock cycle. DO NOT COPY a diagram from the internet, use the internet for information, and then create an original diagram of your own. Include the words that you defined above, and any descriptions and pictures that help explain the rock cycle.
